

Myelomas involves the build-up of the plasma cells in the bone marrow. Interferes with the development and function of other blood cells. The most common type of myeloma is multiple myeloma, where abnormally plasma cells build-up or form a tumor in numerous locations in the bone or marrow.

Symptoms: bone pain, bones that fracture easily, fever, excessive thirst and frequent urination, nausea and vomiting, restlessness.

Treatment: Removing malignant cells from bone marrow, stem cell transplant, chemotherapy, immunotherapy, antibodies, radiation therapy.

Leukemias involves the build-up of a abnormal, white blood cell in the bone marrow, this interferes with its ability to produce red blood cells and platelets. Leukemias can be acute and develop quickly, or chronic and develop more gradually over time.

Symptoms : fever or chills, persistent fatigue, weakness, easy bleeding or bruising, recurrent nosebleeds, weight loss, tiny red spots in your skin.

Treatment : Chemotherapy, Blood transfusion, Stem cell transplant

Hodgkin's disease is a type of lymphoma, which is a blood cancer that starts in the lymphatic system. The lymphatic system helps the immune system get rid of waste and fight infections. Hodgkin disease is when the white blood cells grow abnormally and spread throughout the system making it more difficult for the body to fight infections.

Symptoms: Swelling of the lymph nodes in these areas side of the neck, armpit, around the groin, night sweats, fever, enlarged spleen

Treatment: Radiation therapy, immunotherapy, stem cell transplant

Anemia is a condition in which you lack enough healthy red blood cells to carry adequate oxygen to your body's tissue. Anemia tends to make a person feel tired or weak. There are many forms of anemia, each with a different cause. Anemia can be temporary or long term and it can range from mild to severe.

Symptoms include : Fatigue, weakness, pale or yellowish skin, irregular heartbeats, chest pains, cold hands and feet, headaches

Treatment : Dietary Supplement, Blood transfusion, Vitamin antibiotics.
